Introduction

Cases of food safety related issue are increasing over the years with a serious impact on public health and industry. Growing population, urbanization & limited resources are some of the situation that creates problems with standards in food and food hygiene, adversely affecting quality and safety for food supplies. These new challenges to the food supply have therefore prompted relevant organizations to seriously consider adopting a food safety system on a wider basis.

In today's complex trading environment and complex needs, consumers are continuously introduced to new food, unfamiliar & sophisticated treatment of food or even unknowingly consume contaminated food. Disregard of these situations, the establishment of comprehensive food safety system would definitely protect them through implementation of appropriate standard and quality control measures that would detect and prevent danger from happening.

Thus, the seminar is to address issues to further strengthen the food safety thereby supporting the food industry in its effort to provide high quality products. It will also highlight developments in research and innovations in food science and technology.

Objectives

- To share the latest news and information on food safety, as well as offering ideas for general improvements in safety and food safety industries.
- To offer knowledge about Halal related issues and technologies for Halal Authentication
- To further strengthen the food safety system and thereby supporting the food industry in its efforts to provide safe high quality products
- To highlight significant developments in food science and technology with an emphasis on food products innovation and processing
- To keep abreast with most current developments and focus areas within food safety locally and internationally

Paper Presentation

A total of 13 papers are scheduled to be presented at the seminar. There will be 1 theme speech, 2 keynote address and 10 papers will be delivered by the notable local speakers covering the following scopes:

- Food Contaminant
- Food Irradiation
- Food Quality and Challenges
- Food Supply Chain
- HACCP & GMP
- Halal Related Issues
- Hygiene Management
- National Standard Compliance Program
- Product Recall : Crisis Management
- Safety Assessment and Authorisation

Who should attend?

- Policy Maker
- Food Safety Operation / Project Management
