

## 1. 2019 CRT Series Forum

### 1 Main Forum

China Radiation Technology Conference (focusing on domestic and foreign industry regulations, industry trends, big data, etc.)

### 9 Parallel Forums

New achievement and perspective of radiation protection

Natural radiation protection

Monitoring and evaluation of radiation environment

Occupational disease and radiation protection

Ionizing radiation Measuring and its measuring instrument

Electromagnetic radiation protection and shielding

Radiation Hygiene (Radiation protection for Nuclear and Radiographic Medicine)

Radiation protection for particle accelerators

Emergency system for nucleus and radiation

The security and safety of radioactive materials transporting

Radioactive waste management and decommissioning of nuclear facilities

## 2. Three Concurrent Exhibitions in 2019 CRT

Radiation Protection Technology and facilities Exhibition

Civil Nuclear Technology Industry Exhibition

Nuclear and Radiographic Medical Technology Exhibition

## 3. Exhibition Overview:

Radiation Protection Technology and facilities Exhibition will focus on displaying radiation environment monitoring instrument, radiation protection materials, Medical radiation protection system solutions, protection of irradiation processing base, nuclide (packaging, transportation and storage) relevant protection, electromagnetic radiation protection, radiation protection equipment for mineral extraction and processing, radiation protection equipment for particle accelerators, personal radiation protection equipment, nuclear and radiation emergency system, radioactive waste management, decommissioning and maintaining of nuclear facilities.

## 4. Exhibition Scope:

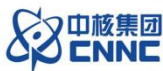

- **New technologies and achievements in radiation protection:** Academy of Sciences,

research institutes, universities

- **Radiation monitoring instrument:** Multi-probe radiation monitor, electronic personal dosimeter, gamma Area Monitor, surface contamination detector used for body, Environmental/site radiation monitoring equipment, Portable radiation measuring instrument, Neutron measuring instrument, Radioactive source monitoring, Laboratory radiation protection research equipment, Protective robot
- **Radiation protection material:** Various types of medical radiation protection materials, radiation processing base used radiation protection facilities, radiation protection doors, radiation protection windows, radiation protection coatings, protective lead plates, protective lead bricks, lead glass, barium sulfate, protective wear, nuclear packaging drums, radiation protection for particle accelerators, electromagnetic shielding materials, basic protection and overall shielding of machine room
- **Pollution control of radiation environment and safety of nuclear energy:** Radioactive waste treatment, decommissioning and maintaining of nuclear facilities, technology for prevention and control of radioactive environmental pollution, Construction of radiation monitoring stations, Nuclear and radiation emergency command system, Environmental radiation monitoring system, therapy for radiation sickness, radiation detection service agency, Design and construction of civil radioactive engineering

Top enterprises in the civil nuclear technology industry were invited as our exhibitors:

## 5. Exhibition Expenses:

- **Standard booth:**  
USD 5000/9m<sup>2</sup>
- **Raw space: (Rental from 36m<sup>2</sup>)**  
USD 500/m<sup>2</sup>
- **Special fees for standard booth: Double opening + 10%**

**Note:**

**All exhibits in the exhibition must conform to the regulations of the State Nuclear Safety Administration, the State Food and Drug Administration or relevant government agencies, and the exhibits exclude radionuclide objects.**

- a. Standard booth: to be rented from 9m<sup>2</sup>, one information desk, two chairs, one fascia board in Chinese and English, one 220V power socket, two spotlights or fluorescent lamps, and covered with carpets.
- b. Raw space: to be rented from 36m<sup>2</sup>, without any equipment. In addition, construction management fees must be paid to the exhibition hall and electricity box fees must be paid to the designated builders.
- c. Both standard booth and raw space include organizing users to visit and negotiate, publishing the company's brief introduction free of charge on the exhibition catalogue, cleaning public venues, and providing security, public liability insurance and other services.

**6. Exhibition Procedures:**

- After confirming the participation, confirm the booth from the organization unit and ask for the application form, fill in and seal it and fax it to the organization unit;
- Please wire the exhibition fees to the organization unit within one week after applying for the booth. If there is any balance, please pay it before October 10, 2019;
- Principle of booth sequence allocation: "Applying first, paying first, arranging first"
- After receiving the booth fees, the organization unit will send the *Exhibition Manual* one month before the exhibition starts;

**7. Contact us:**

Shanghai Tiansheng Exhibition Service Co., Ltd.

Address: Room 1005, No. 1221 Husong Highway, Shanghai

Tel.: (86) 21-6786 0079
